*The world is opening up for new doctors.  
Are you ready with your One Big Push?*

It's a new era for the Philippine medical profession. Increased demand for doctors overseas opens new opportunities both here and abroad. And the ASEAN integration of 2015 promises greater mobility among the best professionals. You, Doctor, are urgently needed. Now.

Get a foothold on these opportunities. Pass the medical boards. Not next year. Not in a couple of years. But in August. 2014.

You don't want to take chances. Our passing rates reach **80 to 100% of program finishers**, for first timers or repeaters. With no leaks, no cheats, and no tricks. Just plain hard work, great teachers, and a well-planned review program, your One Big Push to success.

**BRAINS MEDICAL BOARDS  
REVIEW.**

**Be with us from start to finish.**

*And be ready for the world.*

## PROGRAM FEATURES

### Total Coverage: The Most Complete Program.

An effective review leaves no question unexpected. But there's no foretelling the exam, even with a list of tested competencies. The only valid strategy is to prepare for the worst: learn everything in the syllabus and more.

BRAINS Medical Boards Review is the most complete, most intensive review program, covering basic and clinical subjects separately and in sequence. So you don't miss anything.

### Total Expertise: Specialist Faculty.

Learning comes from a respect for your teacher's expertise. At BRAINS, we know this very well. Our faculty recruitment is by invitation only: our only criterion is excellence in both subject knowledge and teaching competence. We invite only the finest medical educators and specialist-practitioners to teach. No other review can do better.

### Know yourself: Diagnostic Testing.

Our board diagnostics/simulations not only score your knowledge of content but your ability to handle the different taxonomic levels of the questions in the test: *recall, analysis, evaluation and synthesis*. So you not only review for exam content, but develop the thinking skills needed to answer the questions especially those that stump you. Two diagnostics, pre- and post-review, and another midway through the review, track your progress. So you can adjust your study pace and train accordingly.
